Bilateral Meetings

- Wednesday 13:00 - 17:00

Description

Bay Zoltán Nonprofit Ltd. for Applied Research (BZN), Hungary's leading applied research institution carries out its RTDI tasks in the framework of 3 research divisions: Biotechnology (Szeged), Intelligent Systems (Smart) and Engineering divisions (Budapest, Miskolc). The Division for Biotechnology of BZN (BAY-BIO) was the first established organizational unit. The activity of the Ltd. and BAY-BIO within the biotechnological sector forms a technological bridge between the phases of basic research and experimental development, in order to realize the economic utilization of R&D achievements. Due to our flexible approach and comprehensive professional background established in the area of applied research, we can provide creative, innovative solutions and answers to the biotechnology-related problems and questions arising on our partners' side. In cooperation with the other divisions of the Ltd., BAY-BIO focuses on the realization of the following tasks: • provide applied research background for domestic and international corporate partners • implement goal- and product-oriented projects via participation in tenders • provide a cutting-edge service portfolio for partners • practice-oriented education Due to its strategic cooperation projects, BAY-BIO has comprehensive experience in the areas of agro-biotechnology, environmental biotechnology, oil microbiology and biotechnology as well as in the application of microbiological technologies in food industry, algal biotechnology, molecular biology, bioremediation and automated fermentation.
