andrija@aero.konelek.com

Country

Serbia

City

Belgrade, Kneza Mihaila 11 [Google map](#)

Areas of Activities

Applied science and research

Innovative technologies in agriculture

Offer

Smart Farming Drone "Robin"

We are developing and manufacturing precision farming drone for surveillance of the crops but also for aerial treatment of the crops. The usefull weight is 50-70kg.

Aerial surveillance offers great way to determine good from bad crops.

Robin can carry a range of cameras such as normal visual but also thermal and vegetation index cameras. These cameras offer to quickly distinguish which crops need more care.

Additionally the drone can be used to water or treat the crops from the air from the tanks of 50-70kg of liquid.

Cooperation Offered

- 1. Investment/Financing**
- 2. Sales / Distribution**
- 3. Manufacturing agreement**
- 4. License agreement**
- 5. Technical co-operation**
- 6. Outsourcing co-operation**
